Why Get Certified in Project Management?

TOP 10 REASONS

- 1 Achieve Business Results
- 2 Attract the Attention of Fortune 500 Companies
- 3 Command a Higher Salary
- 4 Become Internationally Recognized
- 5 Learn the Specific Language of Success
- 6 Earn an Unbiased Endorsement by The Project Management Institute (PMI®)
- 7 Obtain Highly Sought After PMI® Credentials
- 8 Tap Into a Network of Professionals with Experience and Resources
- 9 Understand and Manage all 9 Knowledge Areas of Project Management
- 10 Utilize the International Standard for Project Management

Project Management is a discipline.

It is the indispensable skill set required to achieve tangible business results.

Get PMP® or CAPM® Certified Today!

You may be one of the growing numbers of individuals seeking career advancement and job security in a weak global economy. Earning an internationally recognized and specialized certification, as a project management professional (PMP®) or as a certified associate in project management (CAPM®), will enable you to distinguish yourself and advance your career. For your benefit, **CertifiNOW** has developed an advanced course that condenses a year's worth of preparation into a 3-day class filled with study guides, processes, and test taking strategies to enable you to pass – on your 1st attempt – the Project Management Institute's PMP® and CAPM® certification exams. Our certification exam prep courses are designed around a project management framework, defined by the Project Management Institute (PMI®). In **CertifiNOW** classes, PMI's Guide to the Project Management Body of Knowledge (*PMBOK® Guide*) is strategically demystified so that the students can comprehend it and skillfully apply its relevant information towards passing PMI's PMP® and CAPM® certification exams.

For Members Only

This special private class is limited to members of the following organizations:

- National Black MBA Association (NMBBAA), Atlanta Chapter
- Clark Atlanta University School of Business
- Atlanta Business League (ABL)
- Georgia Minority Supplier Development Council (GMSDC) and certified Minority Business Enterprises (MBEs)
- Morehouse College and Morehouse Medical School Faculty and Staff

Why the Urgency?

Recently 90 percent of executives surveyed claimed that project management is either critical or important to their operations, while a mere 37 percent of respondents felt their firm did, at least, a "very good" job of managing important projects. "Employers tend to feel that the M.B.A. graduates are strong in technical business areas like finance and accounting but need more project management skills". A recent PMI® study indicates that there will be roughly 1.2 million new project management jobs created every year for the next 10 years.

PMI certification exams will become more difficult to pass on July 31, 2013 because the amount of information to learn will increase by 30%. Students enrolled in this class will have until July 30th to take the current 4th edition based PMP® and CAPM® Certification exams.

A Course Designed For You

This course is designed for busy professionals and business owners with very little time, but nevertheless, have the desire to increase their credibility in the marketplace by earning PMI® (Project Management Institute) certification as a PMP® (Project Management Professional) or CAPM® (Certified Associate in Project Management).

This course reduces preparation time required to pass internationally accepted certification exams -- from 12 months down to 3 days -- of classroom instruction. For individuals not seeking certification, this course is beneficial because it provides a solid theoretical framework, the proper paradigm for thinking about the project management profession, and provides insights into the "art and science" of getting things accomplished. **CertifiNOW**, the course provider, specializes in advanced certification training for professionals and consultants in virtually every major industry.

This is an accelerated learning course that teaches the core information in the following
9 Knowledge Areas of Project Management:

1. Scope Management	5. Communications Management
2. Time Management	6. Human Resource Management
3. Cost Management	7. Risk Management
4. Quality Management	8. Procurement Management
	9. Integration Management

Two additional modules on the special application areas of Social Responsibility and Exam Strategy are also included in the course.

Why Offer a Guarantee?

We offer a guarantee because our PMP® or CAPM® Prep course works! It has been progressively fine-tuned for several years. Thus, it is both modern and proven. During that period, virtually all candidates who took this course did, in fact, pass on their first attempt.

Location

CAU School of Business Administration
223 James P. Brawley Drive, S.W.
Atlanta, GA 30314

Dates

This course will be offered on three consecutive Saturdays: June 8, 15 and 22, 2013.

Price

The total individual cost for an open enrollment **CertifiNOW** class is \$1850. However, your sponsoring organizations are bringing this course to you at **discount** approaching **50%**, which equates to only \$950 per person.
